## Four Winns Redesigns Horizon 200

Cadillac, Michigan-based Four Winns, a division of Rec Boat Holdings, recently introduced its newly designed Horizon 200. The new boat is the latest in the Horizon series to undergo a complete redesign, along with the RS model.

"The response from our dealers to the new Horizon has been overwhelming," says Roch Lambert, group president of Rec Boat Holdings. "The new Horizon 200 adds size to the lineup, as well as provides the additional offering of the new RS model."

The Horizon 200 marries sport runabout with luxury performer. Features include Four Winns' signature Stable Vee hull, low-profile swim platform, oversized bow area, convertible swim lounge seats, walk-through windshield, exclusive interior drain-away system, and ample storage.

In addition to the RS model, the Horizon 200 is also available in the optional SS configuration.

For more information, call 231-775-1351 or visit [FOURWINNS.COM](http://FOURWINNS.COM).

MUST-HAVE

## Helping Hand

Need a helping hand from time to time? Hand-ee Cleat is a portable cleat and hand-hold that can temporarily be affixed to any dock pole, piling or other object regardless of material (wood, steel, concrete, PVC, etc.) and with no damaging effects of permanent attachment. It has a patented "open cleat" design that creates a sturdy hand-hold, making it a lot easier — and safer — getting on and off a boat. It's also ideal for customizing your home mooring for docking convenience. Use it to help carry an awkward load, like a kayak, or as a hand-hold while working on or around your boat.

Hand-ee Cleat is made in the USA and constructed of glass-filled nylon. The 54-inch straps are made of polypropylene webbing that's abrasion- and UV-resistant. It retails online for \$59.95.

For more info, call 239-671-8887 or visit [HANDEECLEAT.COM](http://HANDEECLEAT.COM).

# BIOBOR®

Family of Fuel Additives Since 1965

Available at...

**West Marine®**  
and other fine retail stores

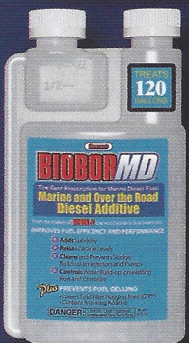

## BIOBOR-JF®

Diesel Biocide and Lubricity Additive

Recommended by Name by Major Diesel Engine Manufacturers

- Prevents clogged filters that shut down engines
- Adds Lubricity exceeding ASTM standards
- Works in both water and fuel for a more effective kill
- Prevents corrosion of tanks and fuel lines
- Approved for Military use (MIL-S53021A)
- Most recommended and/or approved biocide in the world

## BIOBOR-MD®

Performance Diesel Treatment

- Reduces soot up to 94%
- Increases Cetane levels
- Stabilizes diesel for storage
- Sludge dispersants clean the fuel system
- Increases Lubricity in ultra-low sulfur fuels
- Inhibits corrosion and controls water
